**NUCLEUS™**  
Seating

COMFORT FROM  
THE INSIDE OUT

## Cool and Comfortable

Comfort is experienced, not perceived. An office chair layered in bulky foam padding may look comfortable, but it also looks... well... bulky.

Technology has helped make everything slimmer, trimmer, and more streamlined—from TVs to mobile phones. Nucleus brings the same sophisticated, high-tech aesthetic to office seating without sacrificing comfort. Its unique construction distributes weight evenly across the seat and eliminates pressure points, delivering comfort without the bulk.

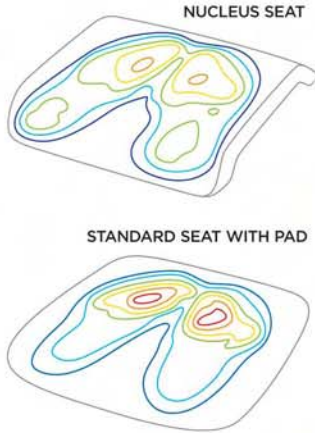

## SEAT CONSTRUCTION

Inside the Nucleus seat, we pull ilira®-stretch NRAM material over a frame, then over-mold it with foam. Once upholstered, this ultra-slim seat provides a soft initial cush and lasting, supportive comfort.

## PRESSURE MAPPING

When you sit in a Nucleus chair, the seat distributes your weight evenly, minimizing pressure points (red zones) for improved circulation and reduced muscle fatigue.

## BACK SUPPORT

The Nucleus back takes advantage of the multi-directional stretch of ilira-stretch M4, which flexes four ways to put instant lumbar support right where you need it.

## **MATERIAL INSPIRATION**

Traditional office chairs use thick padding to keep you comfortable at work. Sitting on a pillow might feel nice, but floating on a suspension seat feels so much nicer—and that's what you get with Nucleus. An advanced suspension material called ilira-stretch NRAM forms the internal seat structure. Another type of ilira-stretch material—ilira-stretch M4—delivers responsive, personalized back support.

## SIT DOWN AND STAND OUT

Nucleus looks like no other chair because it's made like no other chair. The chair's cutting-edge materials and innovative construction make sitting down a pleasure, but they also help Nucleus to stand out visually. With the open knit of its ilira-stretch M4 back and its lighter scale, Nucleus looks right at home in today's open plan office layouts.

## COLOR OPTIONS

Nucleus work chair bases and multi-purpose chair frames are available in two finish options. Either model can be specified in one of three ilira-stretch M4 mesh colors, with hundreds of seat textiles available to personalize the look.

"If you sit on a chair that's uncomfortable, you're sitting *on* it. If you sit in a chair that's comfortable, you're sitting *in* it. With Nucleus, you're definitely sitting *in* your chair."

Marcus Koepke,  
Designer of Nucleus
